

Active Carbon Filters combined with activated alumina FA-Series

Active Carbon Filters combined with activated alumina FA Series

- Filters are delivered in two pieces for easy transportation and installation.

They consist of:

- Grease filter.
- G3 pre-filter.
- H10 High Efficiency air filter (absolute) filter.
- H12 High Efficiency air filter (absolute) filter.
- Active carbon cassette with activated alumina (AP 18).
- G3 Standard final filter.

Active Carbon Filters

Type	Length	Dimensions (m)			Air Flow m ³ /h	Price
		Width	Height			
FA3	2,30	0,68	0,72	2.500 - 3.500	€ 5.802,00	
FA5	2,30	0,68	0,97	4.000 - 5.250	€ 7.672,00	

The filters are mounted in guide rails that facilitate easy insertion and removal for inspection and maintenance.

Upon request the AP 18 cassette can be filled with a wide range of gas specific media or custom blends for heavy or chemical air filtration applications.

Active carbon cassette with activated alumina (AP 18) 300/150

For:

- Restaurants odors.
- Laboratories odors.
- Biological Wastewater Treatment.
