

Digital Room Thermostats iQ

- The iQ series of digital thermostats is designed to meet the heating needs of every home and office building in a simple and efficient way.
- It incorporates a host of innovative features providing us with unrivaled comfort, reliability and precise fuel economy, especially when using the Auto Adpat PID algorithm.
- Its LED matrix display with discreet and elegant design is visible day and night continuously showing the room temperature.
- It incorporates a programming feature for deactivating, which makes it particularly versatile and practical.
- Its installation is simple as the detachable base allows easy alignment before the electrical connection.

iQ10: Digital Room Thermostat with Auto Adapt PID

- 2 different temperature setpoints ECO and Normal.
- LED matrix display.
- Auto Apapt PID.
- Detachable base.
- Adjustable differential, offset, limits.
- Time programmable deactivation.

Type	Price
iQ10	€ 76,10

iQ20: Digital Room Thermostat with Auto Adapt PID & Domestic Hot Water Switch

- Individual domestic hot water switch.
- LED Matrix display.
- Auto Apapt PID.
- Detachable base.
- Adjustable differential, accuracy, limits.
- Time delayed deactivation.

Type	Price
iQ20	€ 89,80

iQ10SW: Digital Room Thermostat for Heating & Cooling with Auto Adapt PID

- Manual heating/cooling changeover.
- LED Matrix display.
- Auto Apapt PID.
- Detachable base.
- Adjustable hysteresis, accuracy, limits.
- Time delayed switch-off.

Type	Price
iQ10 SW	€ 83,60
