

Sound Barriers For Round Duct Systems

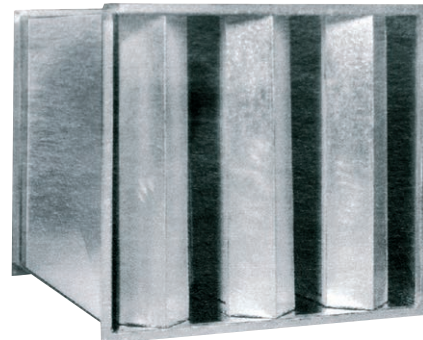

- Made of galvanized steel sheet externally.
- Perforated steel sheet internally and rock wool insulation in between.
- Sound barrier length 1 meter.
- Manufactured in various diameters and lengths upon request.

Type	Dimeters ∅	Price / m
HX-150	150	€ 138,00
HX-200	200	€ 154,00
HX-250	250	€ 201,00
HX-300	300	€ 244,00
HX-350	350	€ 307,00
HX-400	400	€ 360,00
HX-500	500	€ 510,00

Sound Barriers For Rectangular Duct Systems

- Made of galvanized steel sheet internally and externally.
- They have diaphragms made of sound absorbing material for very efficient sound proofing over a great frequency range.
- Available in various dimensions according to air flow and desired sound absorption.
- Price upon agreement with the customer.

Sound Barriers For Round Duct Systems High Sound Attenuation

- Made of galvanized steel sheet externally.
- Perforated steel sheet internally and 2 layers of different density rock wool insulation of a total thickness of 5 cm in between, for better sound absorption over a greater frequency range.
- Sound barrier length 1 meter.
- Manufactured in various diameters and lengths upon request.
- Price upon agreement with the customer.
